Professional Summary

B.Tech Computer Science student with a strong foundation in Data Structures and Algorithms and hands-on experience in C++, Python, and Java. Experienced in building full-stack web applications and machine learning solutions using Natural Language Processing and deep learning frameworks. Interested in applying software development and problem-solving skills to real-world systems.

Education

Vellore Institute of Technology (VIT)

Expected 2027

B.Tech in Computer Science and Engineering

CGPA: 8.21

Intermediate – U.P. Board

81.06%

High School – U.P. Board

87%

Technical Skills

Languages: C++, Python, C, JavaScript, Java

Web Technologies: HTML, CSS, React.js

Databases & Cloud: SQL, AWS DynamoDB

AI/ML: Scikit-learn, TensorFlow, PyTorch, Hugging Face, NLP

Tools: Git, GitHub, VS Code, Flask, Streamlit, MS Excel

Projects

- **Phishing and Fraud Detection System** Built a machine learning based security solution to detect phishing attempts across emails, SMS, URLs, and QR codes using NLP and text classification techniques.
- **Resume Skill Analysis and Job Matching Platform** Developed an NLP system that extracts candidate skills from resumes and matches them with job descriptions using semantic similarity and embeddings.
- **Interview Preparation and Evaluation Platform** Designed a mock interview platform that analyzes responses and generates performance feedback using natural language processing models.
- **Multilingual Language Detection System** Created a deep learning model capable of identifying multiple languages from text input and providing contextual understanding.
- **Floral E-Commerce Web Application** Implemented a full-stack e-commerce platform with product management, shopping cart functionality, admin dashboard, and responsive user interface.
- **Fashion E-Commerce Platform** Built a modern online store with dynamic product displays, filtering features, and user-focused interface design.
- **Cloud-Based Quiz Management System** Developed a scalable quiz application with cloud database integration and automatic result processing.
- **Emotional Text Analysis Model** Implemented a transformer-based NLP model to analyze emotional maturity from textual input.

Experience & Leadership

Software Development Internship (Participant) – Unstop Tech Fair 2025

- Contributed to collaborative development tasks in a structured software development environment.
- Assisted in debugging, feature validation, and improving code quality through peer review.

Senior Core Member – Geo Spatial Club

- Organized technical workshops and supported knowledge-sharing initiatives.
- Mentored junior members in programming fundamentals and project development.

Certifications

- OCI Generative AI – Oracle
- OCI Data Science – Oracle
- Java with DSA – PhysicsWallah
- Complete Frontend Web Development (HTML, CSS, JavaScript) – Coursera
